

MEMORANDUM OF MEETING

February 27, 1986

Attended a meeting with representatives of Dow Chemical and the Army Corps of Engineers to review the data requirements in support of triclopyr as an aquatic herbicide and for use as a herbicide on ditch banks.

The data requirements, as stated in Part 158, were reviewed and the additional requirement of soil photolysis was imposed for the ditch bank use based on § 158.35 (c) (the reason being that application is not via soil injection so soil photolysis could occur).
